

Setting up Stripe with osConcert

At Stripe

Login to Stripe and click the 'Developers' link

This will take you to the Overview page, go to API keys

API keys

Viewing test API keys. Toggle to view live keys.

Standard keys
These keys will allow you to authenticate API requests. [Learn more](#)

NAME	TOKEN	LAST USED	CREATED
Publishable key	pk_test_ppzd7tIK73m5DexZBg0lYo5K	3 Oct	20 Jan 2017
Secret key	sk_test_fDUMP89aX3KXECZGKLnh3AO	3 Oct	20 Jan 2017

Restricted keys
For greater security, you can create restricted API keys that limit access and permissions for different areas of your account data. [Learn more](#)

+ Create restricted key

Here you can copy your Publishable and Secret keys (both live and test) and paste into the osConcert dashboard:

Stripe Secure Payments

Enable Stripe Payments: True
Payment Zone: World Zones, Box Office
Exclude these Countries: --none--
Exclude these Zones: --none--
Set Initial Order Status: Pending
Set Failed Order Status: Stripe:cancelled
Set Completed Order Status: Delivered
Transaction Mode: Test

Testing Publishable Key: pk_test_ppzd7tIK73m5DexZBg0lYo5K
Testing Secret Key: sk_test_fDUMP89aX3KXECZGKLnh3AO
Live Publishable key: pk_test_ppzd7tIK73m5DexZBg0lYo5K
Live Secret key: sk_test_fDUMP89aX3KXECZGKLnh3AO
Webhook key: whsec_KHJ0RlyJaB5Hgex6tSKQAMBFBvPj0Mwf
Display Name: Stripe Secure Payments

You will also need the key for your webhook file – go to the Webhook page and create or edit the webhook

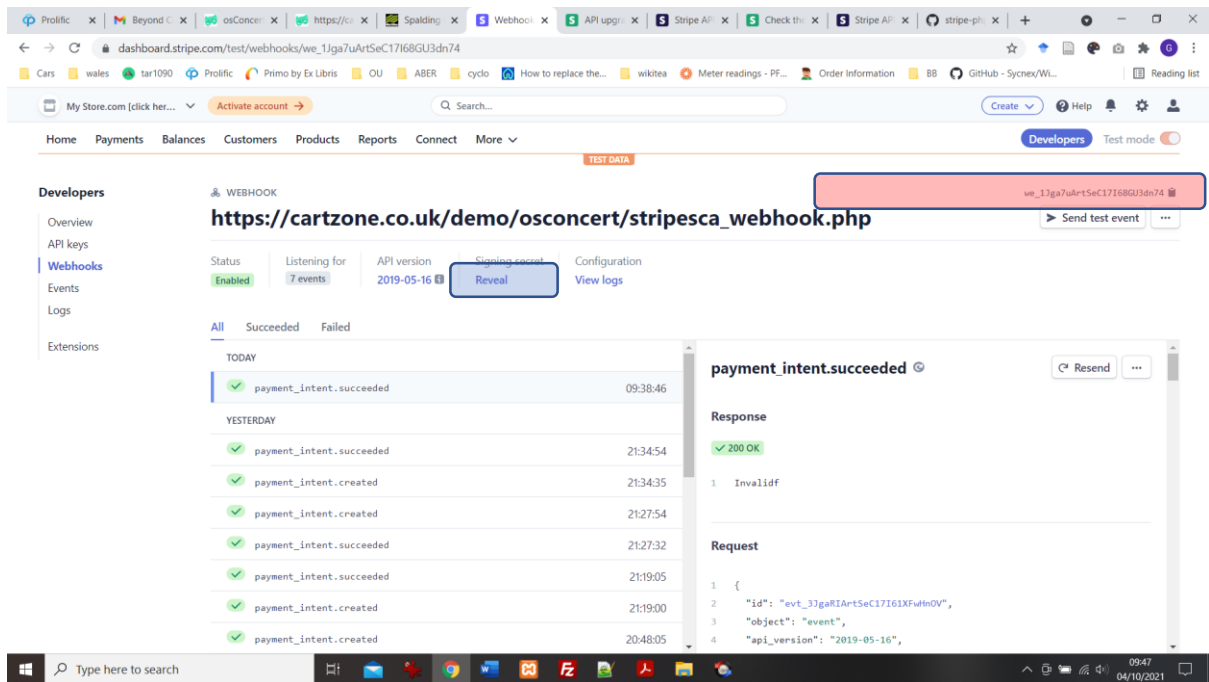

Webhooks

Hosted endpoints

URL	TYPE	LAST 7 DAYS	ERROR RATE	STATUS
https://cartzone.co.uk/demo/osconcert/stripesca_webhook.php	Direct		33%	Active
https://pixced.com/stripesca_webhook.php	Direct		100%	Active
https://pixced.com/stripesca_webhook_test.php	Direct		100%	Active
https://osconcert.co.uk/osconcert/stripesca_webhook.php	Direct		100%	Active
https://cartzone.co.uk/2019/robert/osconcert/stripesca_webhook.php	Direct		100%	Active
https://64a22f1ngrok.io/osconcert006/stripesca_webhook.php	Direct		0%	Disabled

Local listeners

Listen to live Stripe events and forward them to your local device using the Stripe CLI.

You MUST setup the webhook to receive all “payment.intent” messages.

The webhook secret is obtained using the “Reveal” button and usually is in the format whsec_XXXXXXX e.g. whsec_KHJORLYJaB5Hgex6tSKQAMBFbVpj0Mw

It is NOT the key in the format wh_XXXXXX that is visible (top right) on the webhook screen (red outline in the above image)

This screen will also allow you to verify the result of all calls to your site webhooks – if your orders are not updating then this is a good place to start looking.
